

Dictionaries - Solution 1

Note: Code copied from PDF files may have some spaces and blank lines removed. The original formatting is preserved in the code files in the zip archive linked at the beginning of the course.

```
#!/usr/bin/env python3

def display_facts(facts):
    """Displays facts"""
    for fact in facts:
        print('{}: {}'.format(fact, facts[fact]))
    print()

facts = {
    'Jason': 'Can fly an airplane.',
    'Jeff': 'Is afraid of clowns.',
    'David': 'Plays the piano.'
}

display_facts(facts)

facts['Jeff'] = 'Is afraid of heights.'
facts['Jill'] = 'Can hula dance.'

display_facts(facts)
```
